

Habitat for Humanity

Client: Habitat for Humanity

Location: Lount Street, City of Barrie

Services: Lot Grading Design

"Habitat for Humanity is more than building! Habitat is a people-to-people organization forming partnerships with community leaders, builders, suppliers, volunteers and Family Partners; and together, providing simple, adequate and affordable housing to low income families." – www.habitathuronia.com

The Jones Consulting Group has donated their services to Habitat for Humanity Huronia for the purpose of designing a plot plan for their build of a semi-detached dwelling in Barrie Ontario. Although plot plans are typically for small areas, they require a large amount of information and detail. This site specifically offered several challenges in the design process, the largest of which being the preservation of an oak tree located in the center of the lot. The completed design has managed to preserve the oak tree. This offers the future homeowners the ability to enjoy a mature tree, which is not typical for a new home.
